DISSERTATION

Rateless Lossy Compression via the Extremes
Advisor: prof. Tsachy Weissman
The aim of my thesis research is to understand successive refinement more thoroughly so that we can use its ideas to construct a practical lossy compressor with theoretically attractive properties. I proposed an iterative lossy compressor achieving the information theoretic optimum distortion-rate bound with low computational complexity, low storage requirements, and additional properties of both theoretical and practical merit.

Information Theory, Deep Learning Theory, Bioinformatics.

PROFESSIONAL EXPERIENCE

Hongik University, Seoul, Korea
Associate Professor **03/2023 - 02/2024**

Hongik University, Seoul, Korea
Assistant Professor **03/2017 - 02/2023**

Roche Sequencing Solutions, Santa Clara, CA, USA
Principal Scientist I **11/2015 - 02/2017**
- Implemented signal processing pipeline for Next Generating Sequencing (NGS).
- Designed simulators for Next Generation Sequencing.

Ericsson, CA, USA
Summer Internship **06/2013 - 09/2013**
- Designed algorithms for virtual load balancing for routers.
- Implemented RFC 6330 using C programming.
